

PREPARATION FOR BED BUG TREATMENT

It is necessary for you to remove all pets, cover fish tanks and shut off air supply. Remain out of the unit for approximately 6 hours following the treatment.

A complete bedbug treatment is considered 2 full treatments 14 – 21 days apart. It is imperative that the 2nd treatment be completed in order for the treatment to be effective. When treating for bedbugs it is necessary to treat both the bedroom and living room areas.

****First Treatment Requires only the Beds and sofa areas be prepared****

****You can expect the technician to pull back or remove the cloth from the base of the couch and box spring during your service****

Bedroom Preparation

- Dry all bedding including comforters, sheets, pillows, bed skirts, etc.
- Remove all items from the base of the closets and place in sealed bag.
- Pick up and bag clothes that are not already stored in drawers or closets
- Removing items from under the bed.
- All mattresses and box springs must be placed upright against the wall.

****All items should remain in the dryer on high temp for approximately 45 minutes****

General Preparation Information

- Remove all clutter off floors and away from the walls.
- Vacuum all floor areas including around all baseboards and all furniture.
- All furniture should be moved at least 12 inches away from the walls.
- All electrical wall plates should be removed.
- All paintings, mirrors, etc. should be removed from the walls.
- Gather all drapes, blinds, etc. and either tie back or fully open.
- It is important to make sure that all items are removed from all the beds and sofa areas.

After Treatment Information

Ventilate treated areas either by opening the windows and doors or using air exchange/ventilation systems. Following the treatment, do not vacuum or wash within 6 inches of the baseboard area for approximately 3 weeks. Expect to continue to have activity for approximately **2 – 3 weeks** following the second treatment.
