Flies!***

*Good Sanitation.  
Followed by removing

lay their eggs. Killing  
adults will only  
reduce the infestation.  
Elimination of  
breeding areas is  
necessary for good fly  
management.*

Flies carry bacteria and pathogens that can contaminate food and spread illness.

*Outdoor fly bags are a great interceptor before flies get a chance to get in.*

**Tip from the  
JAPCO Man**

Use the RESCUE!®

Big Bag Fly Trap  
outdoors to get rid  
of flies before they
